DERMATOGLYPHIC PATTERNS OF FINGERS, PALMS, AND SOLES:
ANALYSIS OF GENETIC VARIANCE IN TWINS AND USE
IN ZYGOSITY DETERMINATION

by

FRANK REMINGTON SPRAGUE

a thesis

Submitted to the Department of Medical Genetics
and the Graduate School of Indiana University
in partial fulfillment of the degree of

Master of Science

May, 1976

Approved by the advisory committee

Chairman:

Joe C. Christian, M.D., Ph.D.
Professor
Department of Medical Genetics

Member:

Terry E. Reed
Instructor
Department of Medical Genetics

Member:

Ke Won Kang
Associate Professor
Department of Medical Genetics

TABLE OF CONTENTS

I	Review of the Literature.....	1
	Quantitative description of finger patterns.....	1
	Quantitative description of palmar and plantar patterns.....	2
	The inheritance of finger patterns.....	3
	Inheritance of finger ridge count.....	7
	Inheritance of palmar and plantar patterns.....	13
	Zygoty diagnosis with dermatoglyphics.....	18
	similarity methods.....	19
	probabilistic methods.....	23
	discriminant function analysis.....	25
II	Materials and Methods.....	28
	Sample material.....	28
	Printing techniques.....	28
	Variables studied.....	29
	Statistical analyses.....	32
	univariate analysis.....	32
	discriminant analysis.....	33
III	Results.....	36
	Univariate analysis.....	36
	Discriminant analysis.....	38
IV	Discussion.....	47
	References.....	53
	Curriculum Vitae.....	58
