Public Health

IUPUI
UNIVERSITY LIBRARY

IUPUI Open Education Award Finalist

Brian E. Dixon, PhD, MPA, FHIMSS

Dr. Dixon uses OERs in assignment for his online courses. His PBHL-E635 students analyze open data sets that he provides from government websites. In PBHL-E645, students utilize a portion of the Open Learning initiative's "Healthcare Information and Technology Foundations," a completely free resource.

What is OER?

OER is teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property license that permits their free use and re-purposing by others. Open educational resources include full courses, course materials, modules, textbooks, streaming videos, tests, software, and any other tools, materials, or techniques used to support access to knowledge.

--Hewlett Foundation
