IN VITRO RELEASE OF ENDOGENOUS MONOAMINE AND AMINO ACID
TRANSMITTERS FROM RAT BRAIN SYNAPTOSOMES

by

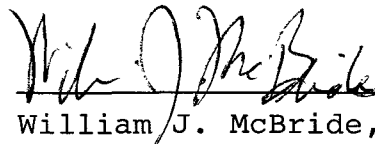

KWABENA OWUSU-DEKYI

Submitted to the faculty of the Graduate School
in partial fulfillment of the requirements
of the degree
Master of Science
in the Department of Biochemistry,
Indiana University

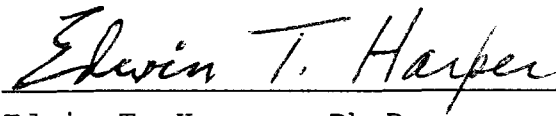

JULY, 1986

This Thesis has been approved as partial fulfillment of the requirements for the degree Master of Science in the Department of Biochemistry, Indiana University, Indianapolis, Indiana.

Date July 22, 1986

William J. McBride, Ph.D.
Professor of Neurobiology and
Biochemistry

Edwin T. Harper, Ph.D.
Associate Professor of Biochemistry

Jay R. Simon, Ph.D.
Associate Professor of Neurobiology
and Biochemistry

TABLE OF CONTENTS

	PAGE
Acknowledgement	ii
Dedication	iii
List of Tables	vii
List of Figures	viii
OBJECTIVE	1
INTRODUCTION	4
Criteria for Identification of Transmitter Substances in the Central Nervous System (CNS)	6
Putative Transmitters of the Cerebral Cortex . . .	11
Monoamines	11
Amino Acids	14
Acetylcholine	16
Putative Transmitters of the Striatum	17
Stimulated Release of Putative Neurotransmitters .	18
Release of Transmitters from Synaptosomes	27
METHODS	31
Materials	31
Animals	32
Dissection of Rat Brains.	32
Preparation of Crude Synaptosomes	32
Superfusion and Collection of Released Transmitters	34
Superfusion Media	34
Superfusion System	35
Superfusion Paradigm	37
High Performance Liquid Chromatographic Analysis of Monoamines	37

	PAGE
Preparation of Mobile Phase	38
Preparation of Standards and Samples	38
Gas-Liquid Chromatographic Analysis of Amino Acids	39
Reagents	40
Formation of DNP-Amino Acid Methyl Esters	40
Gas-Liquid Chromatographic Analysis of the DNP-Amino Acid Methyl Esters	42
Analysis of the Released Amino Acids in Samples	44
Protein Analysis	44
Statistical Analysis	45
RESULTS	46
Effects of Homogenization and Centrifugation Conditions on Efflux and Stimulated Release from Synaptosomes	46
Calcium-Dependent and -Independent Release	47
Effects of Mg^{2+} on the Ca^{++} -Dependent Release of Putative Transmitters from Cerebral Cortical Synaptosomes.	60
Effects of Pargyline on the Release of Monoamines from Synaptosomes	60
Effects of Varying Concentrations of K^+ on Release	62
Effects of the Cholinergic Agents Carbachol, Nicotine and Oxotremorine on Release	63
DISCUSSION.	72
Effects of Homogenization and Centrifugation Conditions on Efflux and Stimulated Release from Synaptosomes	72
Release of Putative Transmitters from the Cerebral Cortex and Striatum	75
Ca^{++} -Dependent Release.	76
Effects of Mg^{++} on Ca^{++} -Dependent Release	80

	PAGE
Effects of Varying Concentrations of K^+ on Release	81
Ca^{++} -Independent Release.	82
Effects of the Cholinergic Agonists, Carbachol, Nicotine and Oxotremorine on Release from the Cerebral Cortex	84
CONCLUSION.	87
REFERENCES.	89
CURRICULUM VITAE.	ix
