EFFECTS OF PROTEIN MALNUTRITION ON IgA LEVELS
IN SECRETIONS OF ADULT AND WEANLING
GUINEA PIGS

by

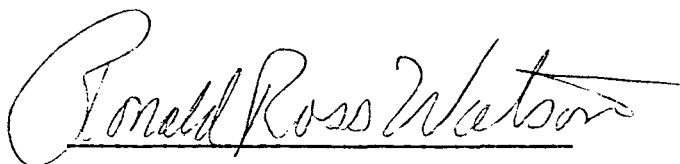

G. Robert Horton

Submitted to the Faculty of the Graduate School
in Partial Fulfillment of the Requirements
for the Degree of Master of Science
in the Department of Microbiology and Immunology
Indiana University
School of Medicine

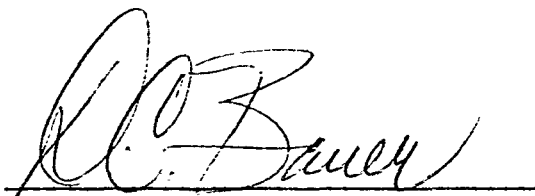

1977

This dissertation has been approved as partial fulfillment of the requirement for the degree of Master of Science in the Department of Microbiology and Immunology, Indiana University School of Medicine, Indianapolis, Indiana.

31 July 1978
Date

A handwritten signature in cursive script, reading "Ronald Ross Watson", written over a horizontal line.

Ronald Ross Watson, Ph.D.
Assistant Professor of Microbiology
and Immunology

A handwritten signature in cursive script, reading "D. C. Bauer", written over a horizontal line.

D. C. Bauer, Ph. D.
Professor of Microbiology and
Immunology

A handwritten signature in cursive script, reading "C. H. Miller", written over a horizontal line.

C. H. Miller, Ph.D.
Associate Professor of Microbiology
and Immunology

TABLE OF CONTENTS

I.	Review of the Literature	1
A.	Historical Background of Mucosal Immunity	2
B.	IgA in Secretions	5
C.	Properties of the Secretory Immune System	10
D.	The Guinea Pig Model	14
E.	Effect of Malnutrition of Secretory Immunity	17
II.	Experimental	20
A.	Introduction	21
B.	Materials and Methods	21
C.	Results	30
D.	Discussion	47
III.	Tables and Figures	51
IV.	Appendix	78
A.	Tables	79
B.	Aminopeptidase Assay	88
C.	Total Protein Assay	90
D.	Radial Immunodiffusion	92
1.	IgG in Genital Secretions	92
2.	IgA in Tears	94
3.	IgA in Genital Secretions	94
V.	References Cited	95
