INVESTIGATIONS INTO THE MECHANISM OF GENOMIC INSTABILITY  
IN RENAL CELL CARCINOMA

Elizabeth Dockerty Smith

Submitted to the faculty of the University Graduate School  
in partial fulfillment of the requirements  
for the degree of  
Master of Science  
in the Department of Pathology  
Indiana University

July 1998

Accepted by the Graduate Faculty, Indiana University, in partial fulfillment of the requirements for the degree of Master of Science

## TABLE OF CONTENTS

Introduction	
Clinical Features and Epidemiology of RCC	1
Histopathology of RCC	3
Staging of RCC	5
Grading of RCC	7
Heritable Forms of RCC: von Hippel Lindau Disease and Hereditary Papillary RCC	7
Molecular Basis of Cancer	8
Role of the VHL gene in RCC	9
Role of MET Gene in Hereditary Papillary Cancer	10
Cytogenetics of the Four Histologic Subtypes of RCC	10
Molecular Genetics of RCC	13
Other Mutations Involved in RCC	17
Flow Cytometry and DNA Ploidy Studies of RCC	18
DNA Ploidy and RCC	19
Genomic Instability	20
Focus of this Study	23
Materials and Methods	25
Results	31
Discussion	40
References	49
