OPEN ACCESS POLICY 5-YEAR REPORT

IUPUI Open Access Policy

In the five years since the IUPUI Faculty Council voted to adopt the campus-wide [Open Access Policy](#), faculty authors and IUPUI University Library's Center for Digital Scholarship have made over 10,000 scholarly articles freely available to the public through IUPUI ScholarWorks. As a result, these articles have been downloaded over 1 million times by readers from around the world.

IUPUI's commitment to open access benefits academic researchers, citizen scientists, and the public by allowing access to articles that may otherwise be prohibitively expensive to read. Supporting open access as an institution offers IUPUI the unique opportunity to invest in research as a communication tool, which can create faster scientific breakthroughs and improve human lives. On behalf of IUPUI University Library and the global community, thank you for your continued support of open access, and we look forward to sharing your future research with the world.

What About Copyright?

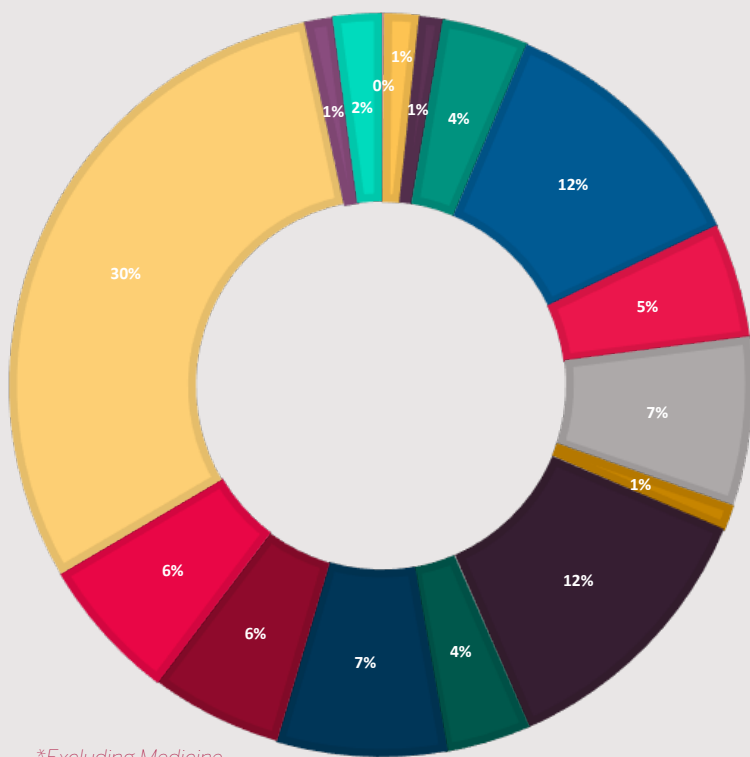

The overwhelming majority (81%) of publishers permit authors to make a version of their article open access with no fees required in university repositories like IUPUI ScholarWorks.¹ But, just in case, the policy also ensures that authors have the rights to share the accepted version of their article. Faculty have retained the right to share the author's manuscript with any changes made as a result of the peer review process, but prior to publisher's copy-editing or formatting.

Opt-Out

The opt-out provision ensures that all faculty authors have the freedom to publish in the journal of their choice. Faculty authors may choose to make an article openly accessible in the institutional repository or to opt out by completing a short form on the [IUPUI Open Access Policy](#) website.

Other Open Initiatives

IUPUI University Library is committed to offering a suite of open access services. The library works as a partner with faculty, students, and the community to launch open access journals, cover article processing fees, manage and share data, create open educational resources, publish reports, archive theses, and digitize cultural artifacts. For more information on these and related services visit [IUPUI University Library Center for Digital Scholarship](#).

Submit Your Work!

Are we missing your article or conference paper? It's not too late. IUPUI authors can login to the [IUPUI Open Access Policy website](#) to deposit or to opt out for an article at any time. Works uploaded to the policy website are processed by the library to comply with copyright policies and to ensure accurate metadata. In addition to gaining a larger readership, articles uploaded to repositories like IUPUI ScholarWorks receive up to a 33% increase in citations.²
